Next Generation Air Tankers Sign Firm To Expand Flight Plans

Scottsdale, Arizona – Evergreen Supertanker Services Inc, one of the Evergreen International Aviation companies, has teamed with Corcoran Associates to expand their new business development efforts. “We have worked closely with Robert McAndrew and his team on several profitable programs and look forward to achieving the goals Evergreen Supertanker Services has identified in their strategic plan”, states Gerald Corcoran, Managing Partner for Corcoran Associates. “Since Evergreen’s Supertanker is not limited to fighting fires, it will be a true utilitarian aircraft with the capability to configure to different applications on short notice. This will enable the multi-mission aircraft to support sensitive security and environmental missions”.

Today, Evergreen’s 747 Supertanker is the largest tanker aircraft available. It has more than seven times the drop capability of a P-3, and its patent-pending pressurized system has the capability to disperse retardant at high pressure for an overwhelming response, or drop retardant at the speed of falling rain in single or several segmented drops. It also offers a significant value for American taxpayers, saving homes, lives and jobs. The Evergreen Aviation companies and our firm believe the Supertanker will also save the U.S. government hundreds of millions of dollars in fire suppression and rehabilitation costs every year.

About Evergreen Supertanker Services

Evergreen Supertanker Services, Inc. is one of the Evergreen International Aviation companies with headquarters in Arizona. The Evergreen Aviation companies realize new aerial firefighting challenges call for a new and improved aircraft. In response to this urgent problem, Evergreen International Aviation has combined its years of aerial firefighting expertise with its experience as an owner/operator of Boeing 747 aircraft to develop the nation’s next generation firefighting and aerial application platform—the Evergreen Supertanker. This aircraft is being built using scientific data and study with an emphasis on safety and effectiveness. To date, over 50 degreed engineers/scientists have invested an estimated 20,000 hours on this project.

About Evergreen International Aviation

Evergreen International Aviation, Inc. is a portfolio of five diverse aviation companies headquartered in McMinnville, Oregon. With international operating authority and a network of global offices and affiliates, Evergreen consists of an international cargo airline that owns and operates a fleet of Boeing 747s, an unlimited aircraft maintenance, repair, and overhaul facility, a full-service helicopter company, an aircraft ground handling company, and an aircraft sales and leasing company. In addition to these endeavors, Evergreen owns and operates Evergreen Agricultural Enterprises and is headquartered near the not-for-profit Evergreen Aviation Museum, home of the Spruce Goose.
